## About Me

Designer moving into product design from a background in brand, web and communication design. I work from research and real usage data: interviewing kirana shopkeepers every month, co-developing a click-through dashboard with data science, and testing my own app against live transactions. Recent work includes a shared household finance app I designed and built with AI-assisted development, a 40+ icon set shipped in the Jumbotail app, and the marketing site for an enterprise AI product.

## Selected Product Work

### KNKU, a shared household finance app

Personal project Sep 2026 React · Tailwind · iOS PWA · built with AI-assisted development (Claude Code)

- Designed and built a shared expense ledger for a two-person household that turns bank SMS into a live dashboard, with invite-based household setup, per-device attribution, budgets, savings goals and a review queue for transactions the parser can't classify.
- Found and fixed four trust problems by testing the live app against 640 real transactions: clipped transaction titles (6 of 6 sampled to 0 of 8), bank logos shown instead of merchants (9 of 14 rows to 0 of 14), and 46 false "recurring" flags cut to 1 by making recurrence a user decision.
- Iterated the dashboard's headline card through five versions, removing an "overspent" verdict that was wrong most months because salary fell outside the household's billing cycle.

### LearnARcade, an AR learning concept for dyslexic adults

MA final major project Jun – Dec 2023

- Researched and designed a mock mobile app using a Triple Diamond framework: stakeholder mapping, expert consultations, user flows, wireframes, a UI kit and high-fidelity screens built on a habit-forming engagement loop.

## Work Experience

### Senior Graphic Designer @ Workfabric AI

Sep 2025 – Present Bengaluru

- Led the Workfabric AI marketing site project as design owner and single point of contact across Product, Marketing and Leadership; designed the site's structure and visual language, turning an enterprise AI product with no interface of its own (ContextFabric) into a clear web narrative.
- Evaluated the existing site and adopted Figma Sites as the design and deployment workflow, shipping the live site with no developer handoff.
- Created the Workfabric AI visual language from scratch and documented it as brand guidelines in Figma, applied across the website, pitch decks and product documentation.
- Produced 10+ product tutorial videos and motion walkthroughs end to end (script, animation, edit and audio), used by customers and the go-to-market and sales teams for onboarding and demos.
- Designed 10+ enterprise and investor pitch decks, including for Fortune 500 prospects and Cognizant.

### Graphic Designer @ Jumbotail Technologies Pvt Ltd

Jun 2024 – Sep 2025  Bengaluru

- Co-developed the Campaign Effectiveness Score (CES) with the Decision Science and Data Analytics teams, a dashboard tracking click-through and interaction patterns across in-app banners, push notifications and in-app messages; used it to redesign in-app banners, which reached 1.6× the previous click-through rate.
- Ran ongoing customer research with kirana shopkeepers (10+ a month through shop visits, phone calls, support-call reviews and in-office customer connect sessions), feeding findings into design through repeated rounds of iteration.
- Redesigned the Jumbotail app's in-app icon set (40+ icons) as one consistent family, shipped in the app.
- Sole designer for Jumbotail Gold, the paid membership for kirana owners, across in-app push and print.
- Designed and shipped the Jumbofarms brand landing page (jumbofarms.com).
- Designed the packaging and brand system for Jumbotail's private-label brands (Jumbofarms, Vedha and Crispy Corner), built to food-labelling (FSSAI) requirements.

### Graphic Designer @ Cicada Media Pvt Ltd

Dec 2020 – Jul 2021  Bengaluru

- Designed the admissions campaign for PES University's new BBA Sports Management course, including the course landing page for desktop and tablet.
- Design consultant for Trippy Goat Cafe & Wine, handling its marketing design end to end, and created and ran its events programme, including The Mixer networking series.

### UI/UX Designer, then Design Consultant @ Upapp Factory

Jul 2020 – Nov 2020  Bengaluru

UI/UX Designer (Jul – Aug 2020); continued as design consultant after the company restructured (Sep – Nov 2020).

- Introduced micro-interaction patterns across the company website, and redesigned its visual identity, layout and customer-service touchpoints.

### Visual Communication Designer (Co-op) @ Levon Homes

Dec 2019 – May 2020  New Delhi

- Designed graphics, animations, 3D renders, Amazon catalogue imagery and sales pitch decks.

## Education

### MA Design Management

**University of the Arts London,** 2023 · London, United Kingdom

### B.Des Fashion Communication

**National Institute of Fashion Technology,** 2020 · Jodhpur, India

## Core Capabilities

- **Product Design:** UI Design · Interaction Design · User Flows & Wireframes · Iconography · Iterating from Live Usage Data
- **Research & Data:** Customer Research (field visits, interviews, customer connect sessions) · Data-Informed Design (CTR and campaign dashboards) · Informal Usability Testing
- **Build:** Front-end Prototyping (React, Tailwind, AI-assisted) · Figma Sites · Shipping Web Pages Without Handoff
- **Brand & Communication:** Brand Guidelines · Motion & Video · Pitch Decks · Packaging
- **Tools:** Figma (incl. Figma Sites) · Claude Code · Adobe Illustrator · Photoshop · After Effects · Premiere Pro · InDesign
